

# Interview Tips

## *It is a conversation...*

You should ask yourself:

*Why am I talking?*

*How am I listening?*

## *Do your homework!*

Ask questions that indicate that you've done your homework on the organization, but also show your value for what your interviewer has shared with you.

## *Be prepared....*

You will be asked to give examples of anything that is stated on your resume.

## *Expectations of you...*

Employers will want to know that you will be contributing to the organization's culture and that you can collaborate effectively with others.
